

Table 2: Protective Action Criteria (PAC) Rev 24B based on applicable 60-minute AEGLs, ERPGs, or TEELs (Chemicals listed in alphabetical order)

PAC Rev 24B – June 2009

Table 2 presents an alphabetical listing of the chemicals in the PAC data set and provides the Chemical Abstract Service Registry Numbers (CASRNs), PAC data, and technical comments focusing on changes in the PAC values since the previous version of the PAC/TEEL data set (Rev 23).

PAC values are provided for TEEL-0, PAC-1, PAC-2, and PAC-3.

Values are given in parts per million (ppm) for gases and volatile liquids and in milligrams per cubic meter (mg/m^3) for particulate materials (aerosols) and nonvolatile liquids.

The columns presented in Table 2 provide the following information:

Heading	Definition
No.	The ordered numbering of the chemicals as they appear in this alphabetical listing.
Chemical Name	The common name of the chemical.
CASRN	The Chemical Abstract Service Registry Number for this chemical.
TEEL-0	This is the threshold concentration below which most people will experience no appreciable risk of health effects. This PAC is always based on TEEL-0 because AEGL-0 or ERPG-0 values do not exist.
PAC-1	Based on the applicable AEGL-1, ERPG-1, or TEEL-1 value.
PAC-2	Based on the applicable AEGL-2, ERPG-2, or TEEL-2 value.
PAC-3	Based on the applicable AEGL-3, ERPG-3, or TEEL-3 value.
Units	The units for the PAC values (ppm or mg/m^3).
Comments and changes from PAC Rev 23	Technical comments by the developers of the PAC data set. Indicates changes from the previous version of the PAC/TEEL data set. A “T” in the comment field, typically stands for “TEEL.” The term “SAR,” in red font, stands for “Structure Activity Relationships.” This column will be enhanced in the near future to improve the clarity and completeness of its information.

Chemicals for which **AEGLs** are available have their chemical name, CASRN, and actual values displayed in **bolded and larger** font. Chemicals for which **ERPGs** are available, but no AEGLs, have their chemical name, CASRN, and actual values displayed in **bolded** font. Chemicals for which TEELs are available, but no AEGLs or ERPGs, have their chemical name and CASRN displayed using a regular font.

In the PAC columns of Table 2:

- ***Bold, green, and italicized*** font indicates a PAC between 10% and up to 50% of the LEL (10% LEL \leq PAC < 50% LEL).
- **Bold, underlined, pink and italicized** font indicates a PAC between 50% and up to 100% of the LEL (50% LEL \leq PAC < 100% LEL).
- **Bold, double underlined, red and italicized** font indicates a PAC at 100% or more of the LEL (PAC \geq LEL).

Additional information on the chemicals presented here is provided in PAC Tables 1, 3, and 4.

Table 2, other PAC Tables, introductory/explanatory material (including a glossary of acronyms and abbreviations), definitions of PAC values, and alternative methods of displaying PAC information are available electronically at:

Of particular interest might be Table 4 which presents all values in mass per unit volume (mg/m³) and information on the source of the PAC values.

Additional information on PAC values and Temporary Emergency Exposure Limits (TEELs) and links to other sources of information is provided on the Subcommittee for Consequence Assessment and Protective Action (SCAPA) webpages at:
