

Table 3: Protective Action Criteria (PAC) Rev 26 based on applicable 60-minute AEGLs, ERPGs, or TEELs. The chemicals are listed by CASRN. September 2010

Table 3 presents a list of chemicals and associated PAC values in numerical order based on the CASRN¹ for each chemical. Chemicals without an identified CASRN number are issued an identification number, preceded by the letter “z” for purposes of identification in the PAC data set. PACs are presented in the units of the original request, either ppm or mg/m³.

The columns presented in Table 3 provide the following information:

Heading	Definition
No.	The ordered numbering of the chemicals as they appear in this listing by CASRN
Chemical Name	The name of the chemical substance submitted to the PAC development team
CASRN	The Chemical Abstract Service Registry Number for this chemical
TEEL-0	This is the threshold concentration below which most people will experience no adverse health effects. This value is always referred to as a TEEL-0 because AEGL-0 and ERPG-0 values do not exist.
PAC-1	Based on the applicable AEGL-1, ERPG-1, or TEEL-1 value
PAC-2	Based on the applicable AEGL-2, ERPG-2, or TEEL-2 value
PAC-3	Based on the applicable AEGL-3, ERPG-3, or TEEL-3 value
Units	The units of the original request (ppm or mg/m ³)

Chemicals for which **AEGLs** are available have their chemical name, CASRN, and AEGL values displayed in a **bolded and larger font**. Chemicals for which **ERPGs** are available, but not AEGLs, have their chemical name, CASRN, and ERPG values displayed in a **bolded font**. Chemicals for which TEELs are available, but not AEGLs or ERPGs, have their chemical name, CASRN, and values displayed using a regular font.

Additional information on PAC values, TEEL values, and links to other sources of information is provided on the Subcommittee for Consequence Assessment and Protective Action (SCAPA) webpage at: <http://orise.orau.gov/emi/scapa/teels.htm>.
