

Table 1: Chemicals of Concern and Associated Chemical Information. PACs Rev. 29, May 2016

Table 1 is an alphabetical list of the chemical substances, their Chemical Abstracts Service Registry Numbers (CASRN)¹, and pertinent physical constants. Future reviews will result in continuous updates to these data. There are also columns that provide the date of the original derivation of the PAC values, the date of the last technical review of the data used for deriving the PAC values, and the date of the last revision of the data used to derive the PAC values.

The information presented in this table is derived from various sources including:

- **The Handbook of Chemistry and Physics**
Lide, D. R. (Ed.) (2009). *CRC Handbook of Chemistry and Physics*, CD Rom (90th Edition-2010 Version). Boca Raton, FL: Taylor and Francis.
- **Hazardous Substances Data Bank (HSDB)**
The HSDB is “comprehensive, peer-reviewed toxicology data for about 5,000 chemicals” and it is accessible online at <http://toxnet.nlm.nih.gov/cgi-bin/sis/htmlgen?HSDB>.
- **The Merck Index**
O’Neil, M. J. (Ed.) (2006). *Encyclopedia of Chemicals, Drugs, and Biologicals* (14th edition). Merck Research Laboratories. Whitehouse Station, NJ.
- **SAX**
Lewis, R. J., Sr. (2012). *Sax’s Dangerous Properties of Industrial Materials* (12th Edition). New York: John Wiley & Sons.

Sometimes data on physicochemical properties vary among sources. As the physical constants presented in this table are obtained from published sources, users are advised to consult trusted references to verify the accuracy of the information.

Information on PAC values and Temporary Emergency Exposure Limits (TEELs) and links to other sources of information are provided on the Subcommittee on Consequence Assessment and Protective Actions (SCAPA) webpage at <http://orise.orau.gov/emi/scapa/default.htm> provided in Table 1 is described below; it covers two pages.

	Heading	Definition
First Page in Table	No.	The ordered numbering of the chemicals as they appear in this alphabetical listing
	Chemical Compound	The name of the chemical substance submitted to the PAC development team
	CAS Number (CASRN)	The Chemical Abstracts Service Registry Number for this chemical
	Molecular Weight (MW)	The molecular weight of this chemical
	Units of Original Limits	This provides the units of measure (e.g., ppm, mg/m ³) that

¹ Information on the Chemical Abstracts Service and CASRN is provided at <https://www.cas.org/cas-home>.

	Heading	Definition
		were initially used to request PAC values.
	ppm to mg/m ³	Conversion factor used to convert “parts per million” to “mg/m ³ ”
	Molecular Formula (MF)	The composition of elements for this chemical
	State at 25°C	Physical state of the chemical (S=solid, L=liquid, G=gas) at 25°C
	MP or FP (°C)	The melting point/freezing point of the chemical in °C
Second Page in Table	No.	The ordered numbering of the chemicals as they appear in this alphabetical listing
	Chemical Compound	The name of the chemical substance submitted to the PAC development team
	CAS Number (CASRN)	The Chemical Abstracts Service Registry Number for this chemical
	BP (°C) @ 760 mm Hg unless indicated	The boiling point of the chemical in °C at 760 mm Hg unless otherwise stated
	Vapor Pressure – mm Hg	The pressure (often expressed in millimeters of mercury, mm Hg) characteristic at any given temperature of a vapor in equilibrium with its liquid or solid form
	Vapor Pressure – T (°C)	The temperature at which the vapor pressure was measured (25°C assumed if not stated)
	SG @ 25°C unless indicated	Specific Gravity (i.e., density of a substance divided by the density of water) of the chemical
	LEL (ppm)	The lower explosive limit
	PAC-TEEL Derivation/ Review/Revision Dates – Originally Derived	The date or nearest approximate date on which the PAC values were derived
	PAC-TEEL Derivation/ Review/Revision Dates – Last Reviewed	The date on which data or other information was reviewed
	PAC-TEEL Derivation/ Review/Revision Dates – Last Revised	The date on which after a review of the input data, changes were made to the data and/or PAC values (e.g., publication of new AEGL values)

Table 1: Chemicals of Concern and Associated Chemical Information

No.	Chemical Compound	CAS Number (CASRN)	Molecular Weight (MW)	Units of Original Limits	ppm to mg/m ³	Molecular Formula (MF)	State at 25°C	MP or FP (°C)
1	Abrin	1393-62-0		mg/m ³		Unspecified	S
